

ABSTRACT OF THE DISCLOSURE

A driving apparatus of a touch panel includes a touch panel for generating a coordinate signal according to a position of a contact point, at least two interface integrated circuits connected to the touch panel, a computer system driving the touch panel and connected to any one of the at least two interface integrated circuits, a sensor for automatically detecting the interface integrated circuit connected to the computer system, and a controller for converting the coordinate signal in accordance with the interface integrated circuit detected at the sensor and transmitting the converted coordinate signal to the computer system.
